Education

Aug 2018 – Jul 2023

University of the Philippines Diliman
Bachelor of Science in Metallurgical Engineering
Cum Laude

Experience

Jun 2025 – Present

Junior UI/UX Designer

Mahusai Inc. | Makati City, Philippines

- Redesigned and created copy for responsive, on-brand Shopify web pages, interactive long-form content, and ad landing pages in Figma, aligning visual storytelling with targeted customer funnel stages.
- Improved designs and developed ad campaigns through tracked and analyzed traffic and user behavior from Google Analytics, Microsoft Clarity
- Developed custom Shopify themes and modular sections from scratch, configuring the theme editor schema to maximize front-end customizability for long-term management.
- Designed intuitive user interfaces and friction-free onboarding flows for new mobile app features, ensuring seamless integration with native iOS and Android API patterns.
- Integrated AI tools (Figma, ChatGPT, Gemini) into design exploration, rapid prototyping, and front-end coding cycles to significantly accelerate layout iteration and turnaround times.

Feb 2023 – Jun 2025

Operations Manager

Brand by Write, LLC | Parker, Colorado, USA

- Facilitated end-to-end onboarding for new clients and remote team members, including client relations, invoicing, payroll processing, and administrative workflows.
- Streamlined content pipeline and reduced communication errors by customizing the project management interface and no code automations through Airtable for a team of 20 remote copywriters
- Created scrapers and text-based algorithms in Wix and Velo code to increase productivity and speed of editing SEO-optimized copies by 40%
- Designed a high-converting portfolio website to source prospective clients; built tailored pitch decks and successfully secured introductory meetings and project discovery calls.
- Created email automations through Airtable that increased response ratio for emails by 50%

Feb 2022 – May 2022

Social Media Data Analyst

W&R Numero Research | Pasig City, Philippines

- Tracked client's daily social media presence through engagements and general sentiments in 50-100 posts by social media verified accounts, while maintaining the quality of data by filtering out bot users and unrelated contents in analysis.
